

Service Technician Job Description

Sheldon Pest Management is seeking a Service Technician in the Niagara-Hamilton Region. The job includes pest detection, elimination and preventative solutions to established clientele. You will receive on-the-job training to support your career development and ensure customer satisfaction. We are seeking motivated individuals with a dedicated focus on using integrated pest management techniques to exceed our clientele's needs and challenges.

Customer service/Sales:

- Service customers needs on best practices to identify, eliminate and prevention of pest issues
- Provide service reports to customers on a regular basis.
- Self-starter focused on quality service with the ability to recommend value added products and services.
- Detail oriented - attention to detail, prompt, courteous, professional at all times.
- Good understanding of the control of rodent and insects – additional training will be provided.

Qualifications:

- Pest Management Technician License is required or working towards a Pest Management Technician Certification through Ministry of Environment - additional training will be provided.
- Ongoing Compliance in Health, Safety, Environment and Human Resources
- Required valid, clean G Driving License - driving company vehicle with chemicals.
- Criminal background check required.
- Excellent verbal and written English communication skills required.
- Previous front-line service or route sales/service experience combined with a high school diploma, post secondary education is an asset.
- Hands-on pest elimination industry experience plus a provincial structural applicator's license is a definite asset.
- Organization skills, disciplined work style and strong work ethic to ensure your effectiveness in planning your schedule to achieve your territory goals.
- Effective problem solving skills with ability to work independently

Working Conditions:

- Scheduled 40 hours per week
- Will be in contact with Pesticide use
- Lifting 20 kg - physical demands require bending, working in small spaces and outdoors
- Handling various spray and chemical application equipment

Why Choose Us:

- Receive a company service vehicle for business use
- Opportunity for long term career in an established pest management company
- Flexible, independent work environment
- We value a culture of safety training and personal protection equipment
- Competitive salary

Sheldon Pest Management provides fully trained and licensed technicians under the standards of the Ministry of the Environment with capacity to perform any necessary pest management duties.
